

MaxBit Modular Plug Crimping Tool

MaxBit has a variety of modular plug crimping tools to fit your needs. We have high-end crimping tools that can be used everyday for excellent crimping results, to economy crimping tools for one-time projects and limited use applications. All of crimping tools work with both 2-prong and 3-prong modular plug blades. Will also work with Y and Z 3-prong blades. Our most popular crimper (24002) is used by many computer and telcom dealers. Our 24005 and 24006 crimpers also work with DEC (shifted latch) RJ-11 and RJ-12 modular plugs.

24005 Professional Modular Plug Crimping Tool - This crimping tool will crimp RJ-22, RJ-11, RJ-12, and RJ-45 modular plugs. It can also be used to crimp RJ-11 and RJ-12 DEC plugs. This tool is designed for people who crimp large numbers of modular plugs on a regular basis. It is designed to require less gripping strength than other professional grade crimping tools. It will crimp modular plugs perfectly every time. The modular plugs are designed to fit into the crimper tightly so that the blades will align perfectly with the punches, which results in an easier crimp and a more perfect crimp. The tool also comes with cutters and modular wire strippers.

24006 Professional Modular Plug Crimping Tool - This crimping tool will crimp RJ-22, RJ-11, RJ-12, RJ-45 (some) and RJ-48 modular plugs. This tool will work with MaxBit and AMP modular RJ-45 modular plugs. It may not work with other manufactures RJ-45 modular plugs. It can also be used to crimp RJ-11 and RJ-12 DEC plugs. This tool is designed for people who crimp large numbers of modular plugs on a regular basis. It is designed to require less gripping strength than other professional grade crimping tools. It will crimp modular plugs perfectly every time. The modular plugs are designed to fit into the crimper tightly so that the blades will align perfectly with the punches, which results in an easier crimp and a more perfect crimp. The tool also comes with cutters and modular wire strippers.

24002 Professional Modular Plug Crimping Tool - This crimping tool will crimp RJ-22, RJ-11, RJ-12, and RJ-45 modular plugs. It can also be used to crimp RJ-11 and RJ-12 DEC plugs. This tool is designed for people who crimp large numbers of modular plugs on a regular basis. This tool will require more gripping strength than our 24005 tool. This tool allows the modular plug to slide in and out of the tool easier than our 24005, but will require more gripping strength to complete the crimp. It will crimp modular plugs perfectly every time. The tool also comes with cutters and modular wire strippers.

24000 Economy Modular Plug Crimping Tool - This crimping tool only crimps RJ-45 modular plugs. This tool is designed for people who crimp modular plugs from time-to-time or for one-time projects. This tool will require more gripping strength than our 24002 and 24005 tools. It will crimp modular plugs perfectly 95% of the time. It may require you to crimp it twice. The tool also comes with cutters and modular wire strippers.

24010 Economy Modular Plug Crimping Tool - This crimping tool only crimps RJ-11 and RJ-12 modular plugs. This tool is designed for people who crimp modular plugs from time-to-time or for one-time projects. This tool will require more gripping strength than our 24002 and 24005 tools. It will crimp modular plugs perfectly 95% of the time. It may require you to crimp it twice. The tool also comes with cutters and modular wire strippers.

24015 Economy Modular Plug Crimping Tool - This crimping tool only crimps RJ-22 modular plugs. This tool is designed for people who crimp modular plugs from time-to-time or for one-time projects. This tool will require more gripping strength than our 24002 and 24005 tools. It will crimp modular plugs perfectly 95% of the time. It may require you to crimp it twice. The tool also comes with cutters and modular wire strippers.
